

*TECHNOLOGY PROVIDERS*

*TRAVEL SUPPLIERS*

*DATA INTEGRATORS*

*DEVELOPERS*

Travel is complicated. There are tens of thousands of unique data points or opportunities for connectivity. Technology providers are building and updating solutions by the hour allowing clients to interface quicker than in the past. Travel suppliers are adding new services and products so frequently that direct integration is the most efficient and accurate means for client interaction. Data integrators have access to more information in a single day than could be compiled in weeks in the past. And Developers are seeking to leverage all of this new technology and data in powerful ways.

With an average of two decades of experience leveraging both travel operations and technology, the team members at the Travel Development Group can help you or your organization achieve your goals faster and connect a larger client base through:

- Integration Between Provider, Delivery, and Tracking Solutions
- Access to Resources Typically Not Easily Available
- Powerful Understanding and Education for Integration Methods
- Development of Integration Applications from Supplier to TMC, Corporation, and Traveler
- Assistance with Client Deployments and Integration into Client Processes and Systems
- And more...

The Travel Development Group provides a very unique offering in the industry. Not only can we create relationships and provide technology suggestions, but we can carry those through to development and, ultimately, to delivery to a global client base.

By leveraging the knowledge and resources available through the Travel Development Group, entrance into the travel industry has never been easier.
